- A. EGPA-35337, 1 March 1961
B. OFPA-57145, 17 February 1961

1. With regard to paragraph 2e of Reference A: Headquarters concurs in the use of ARMSTRONG/29 in the processing of CALIBAN/ARMSTRONG materials if such participation contributes directly to the accomplishment of his original operational mission. Conversely, we should not like to see his use for the benefit of the ARJANER program impede his operational mission.

2. In EGPA-11929, dated 31 January 1961, we outlined our views favoring flexible employment of ARMSTRONG/29 based on specific and immediate operational opportunity as opposed to strict geographic limitation. Apropos of this, we refer to Reference B, in which [] requested ARMSTRONG/29's services for exploitation of specific live leads. We feel that ARMSTRONG/29's involvement with the ARJANER program should not delay or militate against his availability in any case where there are acknowledged live leads to be developed or spotters to be prodded or exploited productively.
